

Space Shanty Token — Whitepaper (Season One)

Abstract Space Shanty Token (SST) is a cozy, community-driven token on Solana themed around a Shiba named Hoshi who dreams of reaching Mars. Community activity powers a mission meter—the Hoshi Constant converts trading volume into story distance. There are no buy/sell taxes and no automatic burns; the meter is a public display of momentum, not a supply mechanic.

1. Lore: Hoshi’s Origin Under Tokyo’s cherry blossoms, Kaito named a curious Shiba “Hoshi” (“star”). Hoshi grew up on bedtime tales of rockets and the red planet. When a mission called Kasei no Tomo (“Mars’ Friend”) searched for a canine crewmate, Hoshi’s courage and community spirit became our north star. Today, the Paw-sengers (holders) carry that story forward—trade by trade, meme by meme—guiding a tiny rocket across a very large sky.

2. Principles

- **Simple & kind: clear rules, friendly tone, no tricks.**
- **Transparent: visible allocations, on-chain verifiability, periodic summaries.**
- **Community-first: art, music, events, and small shared milestones.**
- **Safety-minded: no complex token mechanics; display counters are separate from supply.**
- **Fun over hype: steady seasonal pacing so we enjoy the journey.**

3. Token Specification

- **Ticker: SST**
- **Network: Solana (SPL)**
- **Decimals: 9**
- **Total supply: 1,000,000,000 SST**
- **Allocation: 92% Community & Liquidity, 8% Project Treasury**
- **Taxes/Burns: none**

4. Mission Meter (Propulsion Model)

- **Hoshi Constant: \$1 traded → 12.33 meters of story distance.**
- **Distance goal: 225,000,000 km (Earth→Mars in our lore).**
- **Update cadence: periodically (e.g., every 5 minutes) from public DEX sources.**
- **Display-only: the meter reflects community momentum; it doesn’t change supply.**

Display & UX

- **24h Volume (USD) and a derived Current Speed (km/h)**

- **Km Traveled, Distance Remaining, ETA**
- **Paw-sengers aboard (holders)**
- **Seasonal Fueling Days and Gravity Assist moments that celebrate milestones.**

Data & Smoothing

- **Data is fetched from reputable public APIs/DEX indexers.**
- **Short-window smoothing may be used to prevent jitter and keep the experience cozy.**
- **A reasonable cap may be applied to avoid abrupt, story-breaking leaps.**

5. Roadmap (Season One)

- **T-0 — Lift-Off: SPL mint live, website launch, mission meter online, socials and art reveal.**
- **Orbit — Community & Depth: Listings on Solana DEXs (Raydium/Jupiter). Ongoing LP improvements and community partnerships. Leaderboards, Fueling Days, art/soundtrack drops, collectible postcards from space.**
- **Gravity Assists — Milestones: Celebrations for verified achievements (e.g., listings, holder milestones, major collabs). Bonus story distance and special edition art moments.**
- **Approach — Mars Window: Story arcs conclude Season One as the meter nears the destination. Community vote preview for Season Two theme.**

6. Treasury & Operations The

Project Treasury (8%) is a dedicated fund to ensure the long-term success and growth of the Space Shanty mission. It funds all necessary operations, including infrastructure, security, listings, marketing campaigns, creative commissions, and compensation for core contributors. All movements will be posted publicly, and periodic reports will summarize spending and balances, ensuring full transparency for the Paw-senger community.

7. Community & Branding

- **Paw-sengers are the heart of the project.**
- **Open comms on X/Discord; spotlight fan art, memes, music, and builders.**
- **Wholesome IRL moments (meetups, charity tie-ins) when feasible.**

8. Transparency & Security

- **SPL mint, token accounts, and official addresses will be listed on the site.**
- **Operational keys are stored securely; processes are designed to minimize risk.**
- **Any authority changes or upgrades are announced in advance.**

9. Legal & Risk SST is a community meme token and creative project. It conveys no ownership, revenue share, or claims on assets. Nothing herein is financial advice. Digital assets can be volatile; only participate with what you can afford to lose and follow your local laws.

10. Glossary

- **Hoshi Constant: Fixed Season-1 conversion of \$1 volume → 12.33 m story distance.**
- **Paw-sengers: SST holders / community members.**
- **Fueling Day: A themed rally where the community celebrates and the meter moves more visibly.**
- **Gravity Assist: A milestone event that adds bonus distance to the story.**
